Expanding Horizons

Sky Horizon[®] Property Management System

Introduction

Sky Horizon[®] Property Management system is designed to give the hotel management full control over the front desk and guest transactions such as reservations, groups, walk-ins, financial transactions, folios, deposits, housekeeping, night audit, profile management, revenue history, in-house guests, forecast analysis, availability, guest and room history.

The system is equipped with an advanced interface gateway, which enables online interaction between the front desk and other hotel facilities such as point-of-sale outlets, health clubs, telephone switchboards, receivable/income accounting, door-lock keys, T.V. systems, Internet, and others.

System Components
